

PU HT SERIES

Transparent high temperature resistant TPU hose

- high temperature resistant
- flexible
- smooth inner wall

MEDIUM

PROPERTIES

Structure:

Flexible hose series, made of high temperature resistant TPU Ester, translucent with spring steel wire reinforcement

Characteristics:

Very good temperature resistance, very smooth bore, very good abrasion resistance, good flexibility, free of halogen and softeners. Translucent wall allows for monitoring of flow.

Applications:

Suction and transport of solid materials under high temperature applications

Temperature range:

-40°C to +145°C (short time until +165°C)

Farbe:

Translucent, copper coated steel wire helix

Speziell:

Available in 0,7 / 1,0 / 1,4 mm wall thickness

Also Available in HT PVC Version

Please inquire with our sales team for the data sheet of the version you are interested in.
